Subject: RE: Issue Paper on CFAC Gov Letter

Hi Martin,

We believe that we are on track for a March proposal. We are still completing the documentation necessary to justify proposing the site to the NPL, but as of now, the Region and HQ's staff working on the documentation record do not see issues that would prevent a March proposal.

I want to be clear that we are still in the process of creating the necessary documentation. If it turns out we need additional time to complete the task (on the order of a week or two), we'll be sure to keep you informed.

Responding to the Governor's support letter, we have been and will continue to put resources towards initiating the on-the-ground process regardless of the NPL proposal timing. We first intend to negotiate with the property owners to complete an RI/FS at the site.

Let me know if you have any questions.

Thanks,
Rob

Johanna/Victor/Rob – Are we on track for the March proposal now that we have the letter?

Subject: Issue Paper on CFAC Gov Letter

I am sending along a brief issue paper for the RA's discussion with Governor Bullock regarding the uncertain status of the State Concurrence Letter for what is known locally as the Columbia Falls Aluminum Site (EPA site name: Anaconda Aluminum – Columbia Falls). Johanna and Victor have reviewed this document.

Please do not hesitate to follow up with us if you have any additional questions or would like clarification.

Thank you,
Rob
